

HISTORY. INNOVATION. SERVICE.

L&P Wire-Tie Systems is the leading manufacturer of designed systems for wire.

L&P wire-tie  
SYSTEMS®

a division of *Leggett & Platt*  
INCORPORATED

# When it comes to wire and equipment, we do it all.

## Our People

*We will make your life easier.*

The backbone of L&P Wire-Tie is the professionalism and vast experience our people bring. Whether it's a sales call or a service call, you will find extremely qualified and knowledgeable staff able to assist you in every aspect of your equipment or product needs.

## An Enduring Partnership

Leggett & Platt® was founded in 1883 when J.P. Leggett, an inventor, developed an innovative new bedding component – the coil bedspring. He sought manufacturing expertise from C.B. Platt, and a historical partnership was born.

Today, Leggett & Platt is the recognized worldwide leader in home furniture componentry, bringing innovative products to market that demonstrate a commitment to quality.

## L&P Wire-Tie

*Our products are backed with expertise.*

Your partnership with L&P Wire-Tie starts with the delivery of consistently top-quality wire, wire-tying operating systems, and parts. It continues with all the benefits of working with the industry leaders: an expert team with the knowledge, resources, and integrity to keep your operations online 24/7. What we offer:

- Vertically integrated product supply backed by the strength of Leggett & Platt
- Innovative mindset with the R&D support of Leggett & Platt's team of engineers
- On-call field support
- Nationwide service and sales network – Allow us to help you with our innovation and creativity
- Experienced technicians with you from delivery, installation, and onsite startup training
- Total system assurance – As a partner, you'll benefit from our in-house capabilities

## Our Products

*Our equipment will meet your needs.*

### Galvanized and annealed wire on carriers

Every carrier of galvanized and annealed wire is quality-tested to meet industry standards. Mill certifications ensure that our wire meets the criteria necessary to fit your recycling needs. All wire products, baling wire, box wire, single-loop, double-loop, and straight-and-cut is manufactured from prime material.

### Single-loop and double-loop bale ties

Manufactured from prime material for all your hand-baling applications. Single-loop ties are available in 125-piece or 250-piece counts. Also available in galvanized or black annealed with a variety of packages available. Double-loop is available in 9-13 gauge.

### Box wire

- 100-pound boxes (36 boxes per pallet) or 50-pound boxes (45 boxes per pallet)
- Private labeling available upon request

### Parts *(Direct line: 800.947.3843)*

- L&P Wire-Tie parts have set the industry standard for more than 50 years
- Each part is produced with the most current metallurgical and heat-treated technology to ensure longer life and improved productivity
- A variety of shipping options are available to provide maximum uptime

## Pinnacle™ Wire-Tie System with CORE™ Modular Technology

*Our revolutionary technology will dramatically increase production time and provide a safer work environment.*

- CORE modular system can be swapped out with a spare, allowing continued production
- 80% of wear parts can be replaced in less than 5 minutes
- Down-gauge the wire you're using to lower your operating costs
- Take the CORE to a safe work station away from debris and activity

### 340 Wire-Tie Machine

- Still the most-used wire-tying system in the industry
- Versatile machine for 11-gauge and 12-gauge wire
- Updated with the most advanced electrical controls and systems

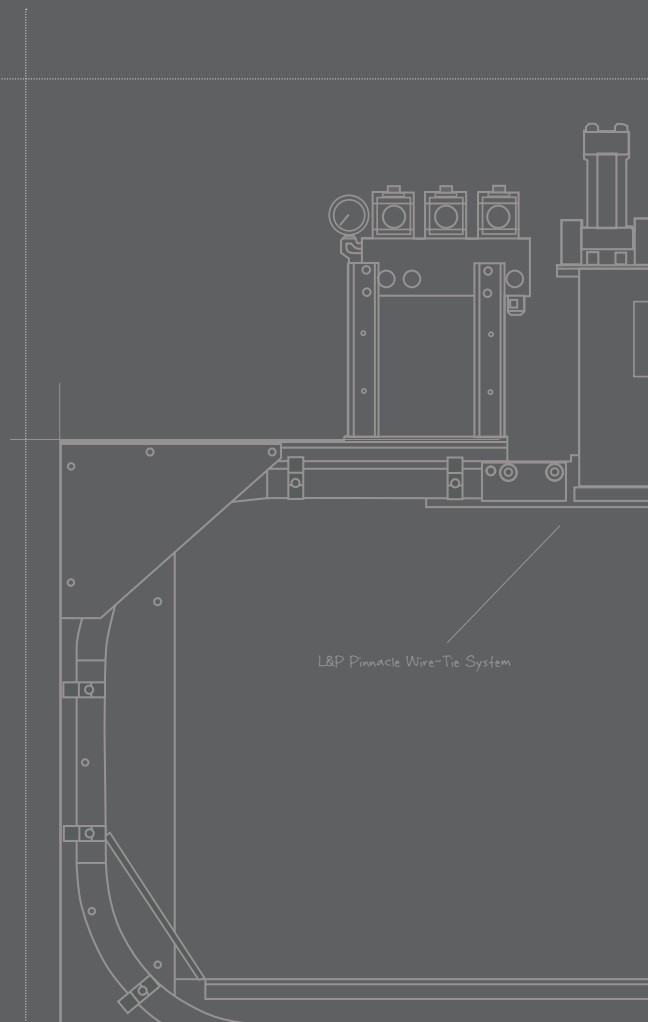

### 330 Wire-Tie Machine

- More than 20 years of dependability, now updated with advanced controls and systems
- Runs the widest range of wire gauges and tensile strengths (10-13 gauge galvanized wire)

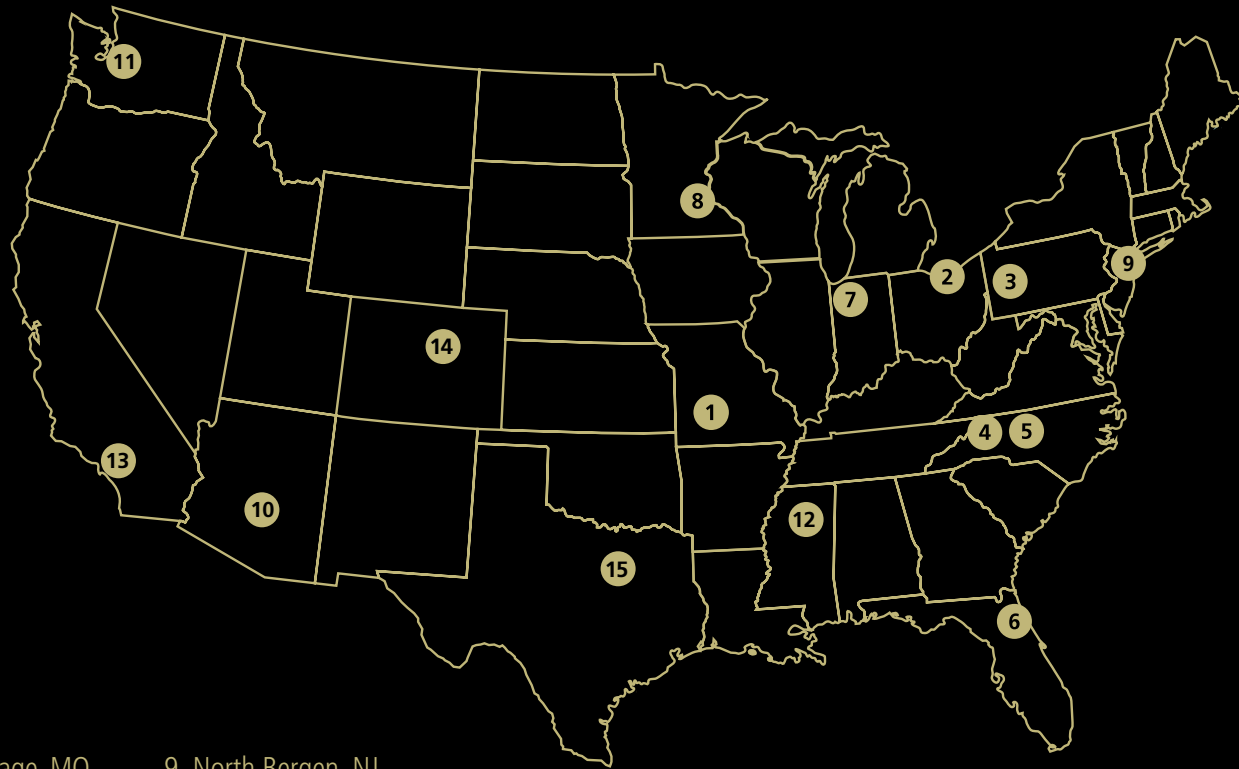

### Service and Training

*We are the industry leader. We offer:*

- More than 10 technical sales/service people with 200 years of collective experience
- Training at our Carthage, MO; Whittier, CA; and Philadelphia, PA; centers
- Onsite training at your facility upon request
- Bilingual training classes
- Training videos on DVD, CD, and VHS
- Field service staff with original equipment parts on hand for you
- Technical representatives available to assist 24/7
